Secretary Sherman, in an address to the Cincinnati Chamber of Commerce, on the 27th, explained his recent order extending until Oct. 1 the time for with drawal from depository banks of the proceeds of the sale of 4-per-cent. bonds, previously ordered to be made prior to the 15th of September, which order has been the occasion of unfavorable comment in various quarters. The amount of deposits so held, says the Secretary, was,on the 23d of August, \$32,947,613.51, divided between the First National Bank and the National Bank of Commerce of New York. This money was to be devoted solely to the purpose of redeeming called bonds, and was actually needed by the Government only just as fast as such bonds were presented for redemp-tion. The called bonds not being presented as soon as anticipated, and general complaint being made that the refunding operations were injuriously affecting ess and advancing the rate of interest, by causing the withdrawing o legal tenders, Mr. Sherman determined Have some well improved farms for sale at about cost of improvements. Have Eastern property to exchange for Kangas Landa. to take the course adopted, solely for the purpose of alleviating the difficulties above stated. Mr. Sherman declares the report that his action was dictated by a desire to relieve the banks, or to elp any one except the community generally, to be without foundation or exbut a political sen his helief that had a contrary course been adopted, the clamor would have been much louder and more just.

The Comptroller of the Currency has ceived the report of the Exami National Banks for the States of Misouri and Illinois. He states that the osses to creditors in Missouri through State Banks and private bankers sine 1876 have been \$2,200,000, while the osses through national banks in the same State since their organization, 15 years ago, have been less than \$1,000,-000. In the State of Illinois the lo since 1874 have been \$5,500,000 by private banks, while the losses by national banks since their establishment in 186 have been less than \$1,500,000.

Statistics of Labor.

Commissioner Le Due is collecting statistics for his next annual report concerning the rate of wages and the cost of living among farm laborers throughout the United States. Within the last year he has ascertained the cost of living and the average rate of wages paid have decreased about 15 per cent. in all parts of the country, with the exception, perhaps, of Minnesota, Colorado, California, Oregon and Washington Tearitory. In Colorado and New Mexico there has been an increase in the rate of wages paid, and a corresponding increase in the cost of living, owing to the demand for labor resulting from the large mining operations that have developed within the last 12 months. In Minnesota, and in the other States and Territories named, the rates of wages paid and the expense of living is about the same as it was a year ago.

In New England the average pay of farm laborers, without board, is \$20.31 per month, spaint \$22.00 a year ago; a decline of about \$22.00 a year ago; a decline of about \$22.00 a year ago; a decline of about er Le Due is col

In Ohio, Indiana, Illinois, Michigan and
Wisconsin the average rate of wages paid to
farm hands is \$20.90, while west of the Mississippi the average is raised to \$23.81. The
price of labor and the cost of living have not
materially changed within the last year—the
great reduction having taken place in 1877.
